

STABILIZATOR

ANTISLIP PAPERBOARD 550 g

Reliable environment-friendly load securing

Stabilizator stripes

Stabilizator
secures Euro-pool pallets

Stabilizator antislip paperboard has an efficient special antislip coating. By that it is suitable for load securing of most commonly materials used in logistics, like for example Euro pallets on truck screen floors or paper mill rolls or metal boxes on aluminium and much more.

Using Stabilizator antislip paperboard supports efficiency of other securing products like webbing load restraint assembly. Often it is possible to reduce the usage of further securing actions.

- Easy and simple handling
- Available in all sizes required
- 100 % recyclable environment-friendly basic material paperboard
- Special coating for a reliable load securing.
Test and certify by VDZ GmbH laboratory with dynamic friction coefficient $\mu > 0,6$
(specification VDI 2700 part. 14)
- Cost saving material

Technical data :	Special coated paperboard 550 gr/m ²
Wide range of standard :	Stripes 100 x 200 mm, 150 x 800 mm, 150 x 1100 mm Sheets 1250 x 1200 mm or other sizes on request Rolls of 1200 mm x 40 ml
